

INFORMATION REGARDING THE PURCHASE OF BULLET COINS AND SHARES

Currently, there are 5,000 available Shares. One Share comprises of 500 Tokens/Coins (Bullet Coins). One Bullet Coin currently has a value of 1 ounce of 99.9% Pure Gold. Each Bullet Coin has its own unique registry number and Certificate of Ownership.

Upon Launch, one share will be valued at one million US dollars. One Share will have the value of 500 Bullet Coins, of 99.9% Pure Gold.

One Share = 500 Coins = 500/one-ounce (oz.) coins = one million US dollars of Gold on the AMC Registry in the purchaser's name and Certificate of Ownership (A Share can be collectively purchased as one entity and traded as one entity of 500 Bullet Coins).

A Share's value of Bullet Coins cannot be traded below 75% of its value. If such a transaction occurs, the Share will be returned to the Registry, and the remaining 25% of the Share's Value in Bullet Coins will be paid out to Share Holders at the current market value.

A buyer purchases one Share, valued at one million US dollars, and AMC secures back to the buyer one million US dollars in Gold giving the buyer the ability to use that one million US dollars to be traded on our CryptoCurrency exchange, and as history has proven time and time again, the value of the Bullet Coins will certainly increase.

The registry numbers assigned to the Bullet Coins will reduce, and or eliminate the risk of forgery, resulting in the Bullet Coins having a secured value within AMC (Amazon Mining Chile). The registered Bullet Coins can be sold by trading on our Exchange for its increased value obtained from the speculator's market.

Once the Bullet Coins are removed from the registered Bank, and or Ledger in the Crypto-Cloud, they are redeemed at their current market value, and are no longer traded on the Exchange. Currently, Gold will only be traded in ounces. In the near future, the Silver Bullet Coins will also be traded in ounces.

The ability to trade up to 75% of the Share's (Bullet Coins) value, will create a very lucrative profit source, coupled with the Shareholders' ownership, includes profits as a Shareholder from AMC. Profits will consist from the recovery of assets from the mining conducted by AMC. Further profits will be available to Share Holders from transactions on our fee based exchange.

There are a limited number of Bullet Coins produced and made available, creating a vibrant market fueled by simple supply and demand economics. As the speculators will see their dream opportunity with Bullet Coins come to fruition, it is obvious to see the value this CryptoCurrency-Plus, opportunity affords to all parties involved. A transaction of this nature is rare because it is very fruitful to all participants involved.

The goal of AMC is to have our technology complete, secure, and capable to complete a transaction within 3 to 5 seconds. ("Ripple's")

There will be different levels of transaction fees based on each transaction's value. This will advance our block chain network with its fluidity as well as an incentive to the different transaction validation service providers.
